EXPERIENCE

Freelance Software Engineer

Aug 2025 — Current

Self-Employed – Remote

- **Engineered custom web applications** for diverse clients using modern web technologies to improve their digital presence.
- **Managed the full software development lifecycle**, from initial client discovery and requirements gathering to deployment and maintenance.
- **Sourced and secured new business opportunities** independently by analyzing local market gaps via Google Maps and executing direct outreach campaigns.
- **Delivered multiple small-to-medium web projects** on schedule, ensuring optimized performance, clean code, and user-friendly interfaces.

EDUCATION

University of Gujrat(UOG)

2022 — 2026

Pakistan | BS in Software engineering

- **Maintained a strong 3.25/4.00 CGPA** while specializing in software architecture, data structures, and modern web engineering practices.
- **Developed "Paperbot.com" as a key academic project**, focusing on creating an efficient, user-centric web platform from scratch.
- **Developed strong foundations** in core languages including C++, Python, and web development technologies.
